# EPD50-PRO FRONT PANEL FEATURES

Maintenance Free – washable and replaceable reticulated dust filter **(Item # FILTERDF)** in metal frame to prevent particles from entering the dehumidifier. Easy filter access for easy maintenance.

5" Diameter Duct Air In – low noise fan draws damp air into the unit (Process Air) and forces it through a section of the rotor.

15' Power Cord – eliminating the use of an extension cord when placed in crawl spaces, attics or lofts.

ON/OFF Control Switch / Built-In Humidistat Control Switch – used to turn the dehumidifier on and off, and to regulate humidity level setting.

Remote Humidistat Switch (NOT On/Off Switch) – can be used to regulate humidity level if used remotely.
***Note: Always turn off when external humidistat is not being used.

Remote Humidistat Jack Plug – socket connector when external humidistat (Item # EPHUM24DF) is used remotely
